Abstract: ISO/IEC 12207 provides a common framework for developing and managing software. IEEE/EIA 12207.0 consists of the clarifications, additions, and changes accepted by the Institute of Electrical and Electronics Engineers (IEEE) and the Electronic Industries Association (EIA) as formulated by a joint project of the two organizations. IEEE/EIA 12207.1 provides guidance for recording life cycle data resulting from the life cycle processes of IEEE/EIA 12207.0.

Keywords: acquisition process, audit, configuration management, development process, maintenance process, operation process, quality assurance, supply process, tailoring process, validation, verification

NOTICE

IEEE and EIA Standards and Publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for his particular need. Use of such Standards and Publications is wholly voluntary. Existence of such standards and Publications shall not in any respect preclude any member or nonmember of IEEE and EIA from manufacturing or selling products not conforming to such Standards and Publications, nor shall the existence of such Standards and Publications preclude their voluntary use by those other than IEEE and EIA members, whether the standard is to be used either domestically or internationally.

Standards and publications are approved by IEEE and EIA in accordance with the American National Standards Institute (ANSI) patent policy. By such action, IEEE and EIA do not assume any liability to any patent owner, nor do they assume any obligation whatever to parties adopting the Standard or Publication.

Note: Attention is called to the possibility that implementation of this standard may require use of subject matter covered by patent rights. By publication of this standard, no position is taken with respect to the existence or validity of any patent rights in connection therewith. IEEE and EIA shall not be responsible for identifying all patents for which a license may be required by an IEEE and EIA standard or for conducting inquiries into the legal validity or scope of those patents that are brought to their attention.

Authorization to photocopy portions of any individual standard for internal or personal use is granted by the Institute of Electrical and Electronics Engineers, Inc., provided that the appropriate fee is paid to Copyright Clearance Center. To arrange for payment of licensing fee, please contact Copyright Clearance Center, Customer Service, 222 Rosewood Drive, Danvers, MA 01923 USA; (508) 750-8400. Permission to photocopy portions of any individual standard for educational classroom use can also be obtained through the Copyright Clearance Center.

Introduction

(This introduction is not a part of IEEE/EIA 12207.1-1997, Guide for ISO/IEC 12207, *Standard for information technology—Software life cycle processes—Life cycle data*.)

This guide provides guidance on life cycle data resulting from the processes of IEEE/EIA 12207.0. It describes the relationship among the following: the content of the life cycle data information items, references to documentation of life cycle data in IEEE/EIA 12207.0, and sources of detailed software product information.

This part of IEEE/EIA 12207 provides guidelines for recording life cycle data of IEEE/EIA 12207.0. Where text has been quoted from IEEE/EIA 12207.0, that text is enclosed in a box, for ease of identification.

At the time this guide was completed, the Joint Industrial Standards Working Group had the following membership:

Leonard L. Tripp, IEEE Co-chair

Perry DeWeese, EIA Co-chair
